Lead Data Engineer
Ridgeant Technologies

Project Overview

- **Defination :**

- Focus -digital system ensures that healthcare organizations can improve increase ad conversion rates, precise targeting, reducing inefficiencies and advertisers can make data-driven decisions based on real-time insights.

- **Scope :**

- Delivers personalized advertisements through Patient Portal Platforms based on patient data.
- Provides a scalable architecture capable of handling large volumes of healthcare and marketing data.
- Reduces manual workload and increases reporting accuracy with automated workflows.

Project Overview

- **Objective :**
 - To revolutionize healthcare advertising by leveraging patient data and modern data engineering tools to deliver personalized ads, automate data workflows, and enable accurate, real-time campaign performance insights for improved decision-making and targeting efficiency.
- **Technologies & Tool :**
 - AWS S3
 - Snowflake
 - Fivetran
 - DBT
 - Tableau

Summary of work done

No of Figures	12
Line of Code in project	2378
Auto-Generated Code	680
Number of Test Cases	8
Number of forms	5

Key Features

- **Automated Patient Data Ingestion**
 - Fetches patient data from multiple sources in real-time or batch.
 - Ensures data is structured and stored efficiently in the raw zone.
- **Personalized Ad Targeting**
 - Utilizes patient attributes and behavior to deliver relevant healthcare ads.
 - Improves patient engagement by showing condition-specific content.
- **Real-Time Ad Performance Monitoring**
 - Tracks metrics such as impressions, CTR, and conversion rates in real time..

Key Features

- **End-to-End Automation**

- Reduces manual interventions in data ingestion, transformation, and reporting.
- Minimizes human error and enhances processing speed.

- **Campaign Optimization Insights**

- Visualizes campaign success metrics and patient interaction data..
- Supports data-driven decision-making for future ad strategies.
